ELEPHANT PELLETS

COMPLEMENTARY FEED FOR ELEPHANTS AND OTHER PACHYDERMS (except black rhinos) Roughage is the main constituent of the food ration for elephants, rhinos and other pachyderms. The Elephant Pellets has been developed to cover nutritional needs in terms of vitamins, trace elements and minerals.

- A balanced pattern of vitamins and minerals for good health
- High amount of Crude Fibre, NDF, ADF and ADL
- Low in starch
- Linseed (flaxseed) is used as a natural source of alpha-linolenic acid. Rich in polyunsaturated fats (linoleic acid and alpha linolenic acid). These contribute to a healthy skin and coat
- High amount of Calcium to contributes to a healthy bone development.
- With m  erl (limestone of algae)
- Good available source of Calcium
- helps in reducing fluctuations in pH in stomach
- High amount of Biotin
- With organic bound zinc, manganese and copper to support locomotion, skin and hair, immunity and reproduction
